Art Unit: 3747

Claim 11-14, 18 and 21-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Horiuchi (EP ('402)).

In particular, Figure 1 shows all the limitations of these claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horiuchi in view of Betz.

Horiuchi applies as noted and Betz shows a detachable connector for an injector, including an insulated lead. Since both are similar injectors it would have been obvious to use a detachable connector in Horiuchi.

Claims 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horiuchi in view of Takashi.

Art Unit: 3747

Takashi (JP('454)) teaches a piezoelectric stack in a housing which is closed by an upper and lower plate, thereby making such a detail obvious to use in Horiuchi.

Claims 8, 10, 17, and 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 24-29 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
